Langue
Anglais, Espagnol,Arabe ,Allemend

Permis
B + Voiture

COMPÉTENCES

A0 Programming Languages: Python, C, Java,JavaScript

A1 Git, Docker, Jenkins, Jupyter, SQL

A2 3D Modeling and Design: Blender, CATIA

A3 Experience with Web Development(html,css,js) and Django Framework

CENTRES D'INTÉRÊT
 - AI Research
 -Game Development
 -3D Design
 -Video Game Hardcore

ÉDUCATION

Ingenieure de logicielle et Intelligence Artificiel Université Sidi Mohamed ben Abdellah Ensa Fés
Fés
2022 - 2027

PROFILE

I am a dedicated and innovative Software Engineer with a strong focus on Artificial Intelligence and Data Science. With extensive experience in software development and AI-driven solutions, I have honed my skills in designing, implementing, and optimizing intelligent systems. I am passionate about leveraging AI technologies to solve complex problems and create impactful, data-driven solutions that enhance decision-making processes across various industries. Proficient in multiple programming languages including Python, C, and Java, I have experience developing machine learning models, working with neural networks, and deploying AI applications. I am skilled in using frameworks such as TensorFlow and PyTorch for deep learning and have hands-on experience in natural language processing, computer vision, and data analysis.
In addition to my technical expertise, I bring strong problem-solving abilities and a passion for continuous learning. I thrive in collaborative environments, contributing to both research-oriented projects and real-world implementations.
